

8) Describe major services (functionality) provided by a hospital's reception. Summary: Hospital Management System is a large system including several subsystems or modules providing variety of functions. Hospital Reception subsystem or module supports some of the many job duties of hospital receptionist. Receptionist schedules patient's appointments and admission to the hospital, collects information from patient upon patient's arrival and/or by phone.

For the patient that will stay in the hospital ("inpatient") she or he should have a bed allotted in a ward. Receptionists might also receive patient's payments, record them in a database and provide receipts, file insurance claims and medical reports.

AIM : - To describe the major services and functionalities provided by a **Hospital Reception System** within a **Hospital Management System (HMS)**. This system ensures efficient patient registration, appointment scheduling, admission management, and financial transactions.

PROCEDURE :-

Identify the Key Functionalities of the Hospital Reception System.

Explain Each Functionality in Detail.

Analyze How These Functionalities Improve Hospital Workflow.

Verify the Completeness and Accuracy of the Descriptions.
