

5) Draw a UML diagram for a food ordering system Systems. The activities of the food ordering system are listed below. Receive the Customer food orders, Produce the customer ordered food, Serve the customer with their ordered food, collect payment from Customers, Store customer payment details, Order Raw Materials for food products, Pay for Raw Materials and Pay for Labour.

AIM :- To design a **UML Diagram** for a **Food Ordering System** that models the activities involved in processing customer orders, preparing food, handling payments, and managing raw materials and labor expenses.

PROCEDURE :-

Identify the Key Actors.

Define the Major Use Cases (Functionalities).

Draw the UML Diagram.

Label and Verify the Diagram.

COMPONENT DIAGRAM :-

DEPLOYMENT DIAGRAM :-

STATE DIAGRAM :-

USE CASE :-

SEQUENCE DIAGRAM :-

ACTIVITY DIAGRAM :-

COMMUNICATION DIAGRAM :-

CLASS DIAGRAM :-

ER DIAGRAM :-

RESULT :- The **UML Diagram** for the **Food Ordering System** was successfully designed, illustrating:

1. **Customer interactions**, such as placing orders and making payments.
2. **Kitchen staff responsibilities**, including food preparation.
3. **Restaurant management functions**, such as ordering raw materials and paying for labor.
4. **System processes**, including storing payment details and managing transactions.
